

## **Reduce Food Loss and Waste Act of 2025**

In March 2025, Senators Richard Durbin (D-IL) and Chuck Grassley (R-IA) introduced the bipartisan Reduce Food Loss and Waste Act of 2025 which seeks to create a Food Loss and Waste Reduction Certification to identify businesses that are making efforts to reduce food waste and direct the USDA to create supporting infrastructure.

The bill seeks to:

- Direct the USDA to establish a Food Loss and Waste Reduction Certification program, setting criteria that businesses and organizations must meet to qualify.
- Require the USDA to implement a verification process and authorize a label that certified entities can display on products, buildings, and websites.
